

Easy to use software for governmental fund accounting, utilities and fixed assets in Windows-based and web-enabled formats.

Turnkey Software Solutions for Local Government

LOGICS constantly stays abreast of the latest state-of-the-art technology and database management software in the marketplace. This allows us to provide our customers with the newest technologies available today.

Our software applications operate within a client/server based network environment. In addition, our software applications operate under relational database management software that provides 4GL tools, ODBC (open database connectivity) drivers, facilitating interfaces with 3rd party applications, Windows presentation interface, and ad-hoc query/ reporting capabilities.

LOGICS, LLC is a leading provider of comprehensive computer software solutions designed specifically for Local Governments.

The LOGICS Financial Suite and LOGICS Utilities Suite provide a fully integrated software solution for all of your financial and utility billing needs.

About Us

LOGICS, LLC is a leading provider of comprehensive computer software solutions designed specifically for municipal and county governments. The LOGICS Financial Suite and LOGICS Utilities Suite provide fully integrated software solutions for all financial and utility billing requirements.

LOGICS has been serving local governments exclusively since 1973. We are proficient in implementing software and hardware solutions and have some of the most prominent and successful clients in the southeast including North and South Carolina, Georgia and Alabama. LOGICS provides software solutions including Financial, Utilities, Business License, Tax and Fire Incident Reporting applications for all sizes and types of governmental agencies including private/non-profit, public, independent power, water, sewerage districts and municipalities. We serve over a hundred local, city and county governments and utility authorities.

LOGICS Management Team brings a wealth of experience and entrepreneurial vision rooted in Information Technology and Local Government which serves as the basis for our exceptional growth, leadership, and insight for LOGICS success in every aspect.

Market Leadership

LOGICS knows and understands local governments and what it takes to be a leader. We recognize that the needs of our customers are dynamic and evolve with continued growth and changing requirements. We realize that there are many similar requirements in the way that cities/counties operate but each entity does things uniquely. LOGICS suite of software applications is powerful enough to handle the many unique ways of meeting GAP/GASB, state and federal requirements and streamlines many of the day-to-day processes.

Our Mission: Customer Satisfaction

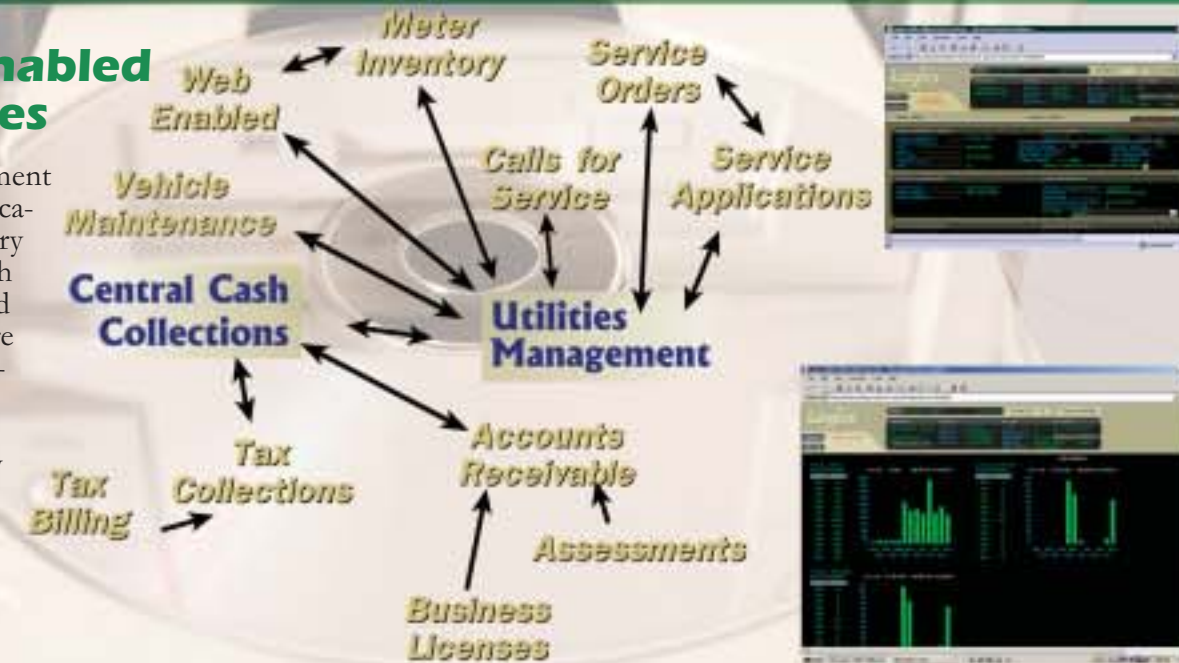

Our mission is to provide technology solutions to city/county governments for better service to their citizens.

Management Team

Logics Web Enabled Suite of Utilities

The Utilities Management Suite of software applications supplies the necessary information to provide both state and federal required reporting. All modules are completely integrated providing a complete history of financial information that is easily and readily accessible by authorized personnel.

Leveraging the latest technical advances and through our continued investment in research and development, LOGICS is the leader in both technology and the software solutions. Our windows based LOGICS Financial Suite and our windows web-based LOGICS Utilities Suite are currently available for installation. These new releases deliver user friendliness, functionality and adaptability.

Logics

Testimonials

"The software is so easy to use, we trained our new employee within days."

"Technical support has been great, we are very pleased with the response time."

"I love the ability to have as many fiscal years online as needed."

"This is exactly what we needed. I don't know how we managed without it."

"We can buy good software from several sources, but we cannot get the quality support like LOGICS provides."

"The Independent Users Group provides several important factors to all LOGICS users. This is an asset that puts LOGICS above other software vendors, who do not have a Users Group. This forum allows LOGICS users to exchange ideas and needs as well as provide software upgrade suggestions to logics for future software releases."

"My account manager is always friendly and readily available, when needed, to keep me aware of updates, new products, or just to help on anything that I need."

LOGICS communicates with our customers via our quarterly newsletter, LOGICALLY SPEAKING, the annual LOGICS User's Group, sales seminars across the southeast and classes offered in our corporate offices. For more information, please contact us.

Customer Support

At LOGICS, we value and take immense pride in our customer relationships. It takes a lot of time and expense to earn a customer's trust and to lose one because of unsatisfactory support is unpardonable.

- On a daily basis, we provide support via telephone or the Internet to our customers. Our goal is to answer and resolve all calls within a day.
- Statutory changes/enhancements to Logics software applications are provided at least once a year, sometimes more often if required.
- Unlimited telephone support.

Our release management methodology extends to our implementation and on-going support procedures.

Training

Comprehensive training is the key to successful implementation of new software applications. Our experienced training staff including former city/county employees, provides a solid background in local government operations and a thorough knowledge of automated systems and their setup. Our staff takes pride in analyzing each customers requirements and customizing our training to specifically meet those needs. At LOGICS, we view training as the most critical part of implementation and use the approach of training workflow, not just data entry.

Our installation and conversion methodology extends to our implementation and training procedures.
